

## **In Eternity**

By

James Gregory Maynard

December 2011

The sun rises in the east  
And always will  
And so  
Will it set in the west

The wind will blow  
And always will  
And so  
Will the tides rise and fall

Babies will be born  
And always will  
And so  
Will the old die

Ocean waves roll across the seas  
And always will  
And so  
Will they crash on the shores

Seasons will change  
And always will  
And so  
Will Spring turn to summer  
Summer to fall  
Fall to winter  
And winters to back to spring

Like endless waves life rolls on  
Over endless days  
Rolling through time  
On and on, and on  
....And always will.
